

Ideation Phase

Define the Problem Statements

Date	05 September 2026
Team ID	ServiceNow
Project Name	Medical Diagnosis Center Service Portal
Maximum Marks	2 Marks

Customer Problem Statement

Create problem statements from the customer's point of view. Focus on the customer, what they are trying to achieve, the barriers they face, why those barriers exist, and how the experience makes them feel.

Problem Statements

Problem Statement (PS)	I am (Customer)	I'm trying to	But	Because	Which makes me feel
PS-1	a patient	book a diagnostic test and appointment online	I have to depend on manual processes and do not have a simple centralized self-service journey	test booking, scheduling and related information are handled through disconnected/manual steps	frustrated, delayed and uncertain
PS-2	a diagnostic center staff member / administrator	manage appointments, patient records and reports efficiently	manual data entry, appointment coordination and report handling take extra effort	there is no single centralized platform to manage the complete diagnostic service process	overloaded, concerned about errors and less efficient

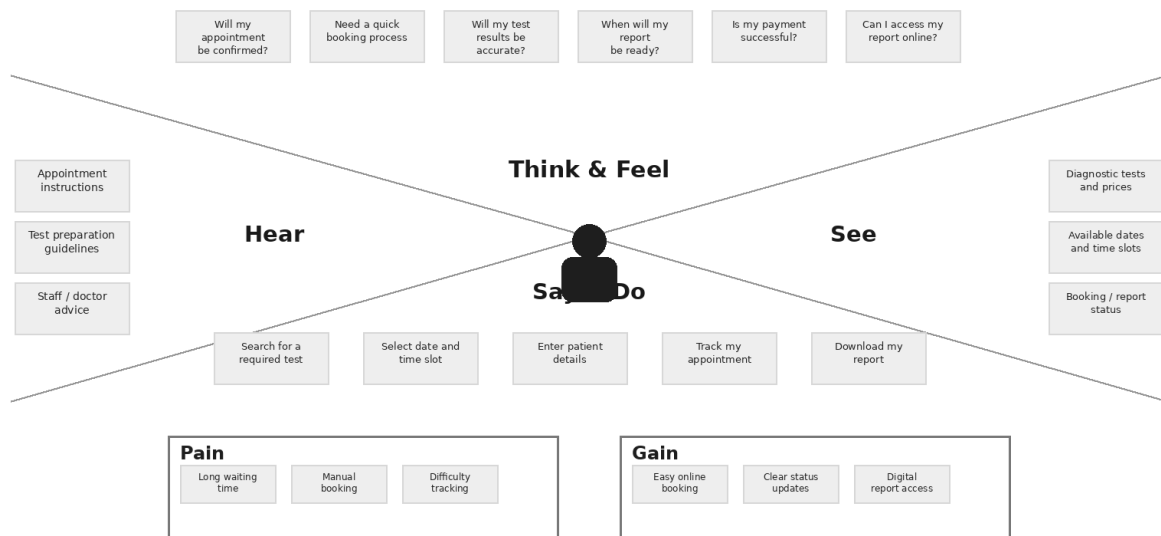

Ideation Phase

Empathize & Discover

Date	05 September 2026
Team ID	ServiceNow
Project Name	Medical Diagnosis Center Service Portal
Maximum Marks	4 Marks

Empathy Map Canvas

Patient perspective: thoughts, feelings, observations, actions, pain points, and expected gains while using the Medical Diagnosis Center Service Portal.

Ideation Phase

Brainstorm & Idea Prioritization

Team ID	ServiceNow
Project Name	Medical Diagnosis Center Service Portal
Maximum Marks	4 Marks

Brainstorm & Idea Prioritization

The ideation phase focuses on identifying the key operational problems in a diagnostic center, generating multiple solution ideas, grouping them by purpose, and selecting the most important and feasible ideas for the Medical Diagnosis Center Service Portal.

Step-1: Team Gathering, Collaboration and Select the Problem Statement

Problem Statement: Diagnostic centers can face delays and poor patient experience when patient registration, diagnostic test booking, appointment scheduling, payment handling, and report delivery are managed through manual or disconnected processes.

Selected Problem: Lack of a centralized digital platform for managing diagnostic center operations and patient services.

The selected problem aligns with the project goal of providing a centralized ServiceNow Service Portal for patients, staff, and administrators.

Step-2: Brainstorm, Idea Listing and Grouping

1. Online Patient Registration	2. Diagnostic Test Booking	3. Appointment Scheduling
4. Automated Approval Workflow	5. Report Generation	6. Report Download Portal
7. Payment Tracking	8. Refund Management	9. Email Notifications
10. Dashboard Analytics	11. Centralized Patient Records	12. Appointment Status Tracking

Grouped Ideas

Patient Services	Administrative Services	Automation Services	Analytics Services
Registration Test Booking Appointment Tracking Report Download	Patient Management Diagnostic Test Management Payment Management	Approval Workflow Email Notifications Report Generation Refund Automation	Dashboard Analytics Operational Monitoring Reports

Step-3: Idea Prioritization

Ideas are prioritized using the two dimensions shown in the trainer's format: **Importance** and **Feasibility**. High-importance and high-feasibility ideas are selected as the core scope of the project.

	Low Feasibility	Medium Feasibility	High Feasibility
High Importance	Dashboard expansion	Payment tracking / analytics	Registration / Test Booking / Scheduling / Reports

Medium Importance	Future integrations	Refund management / advanced notifications	Appointment reminders / status tracking
Low Importance	Non-essential add-ons	Optional enhancements	Minor UI enhancements

Final Selected Idea: Medical Diagnosis Center Service Portal

Reason: It combines patient self-service, centralized records, appointment management, diagnostic test booking, report management, payment handling, workflow automation, and administrative visibility through a single ServiceNow portal.
