Data Flow Diagrams

A Data Flow Diagram (DFD) shows how data enters, moves through, is processed by, and is stored in the Medical Diagnosis Center ServiceNow application.

Medical Diagnosis Center - DFD Level 0

DFD Level 1 - Diagnostic Test Booking and Report Flow

User Stories

Use the following table to list the user stories for the Medical Diagnosis Center Service Portal.

User Type	Functional Requirement (Epic)	User Story Number	User Story / Task	Acceptance criteria	Priority	Release
Patient (Service Portal user)	Registration	US-1	As a patient, I can register or provide my details so that I can use the diagnostic center portal.	Patient details are captured and the patient can access the portal journey.	High	Sprint-1
		US-2	As a patient, I can view available diagnostic tests and their details before booking.	Available tests and relevant test details are displayed.	High	Sprint-1
	Test Booking	US-3	As a patient, I can select a diagnostic test, date and available time slot and submit a booking request.	A valid slot can be selected and an appointment record is created.	High	Sprint-1
		US-4	As a patient, I can receive confirmation when my appointment is approved or confirmed.	Confirmation details are available and the patient is notified.	High	Sprint-1
	Appointment Tracking	US-5	As a patient, I can view my appointments and their current status.	The patient can see appointment details and status.	High	Sprint-1
		US-6	As a patient, I can cancel or reschedule an eligible appointment.	Eligible appointments can be cancelled/rescheduled and the status is updated.	Medium	Sprint-2
	Payment	US-7	As a patient, I can view the payment status and complete payment for a diagnostic service.	Payment status is stored as Pending, Paid, Failed or Refunded.	High	Sprint-1
	Reports	US-8	As a patient, I can receive a notification when my diagnostic report is available.	A report-availability notification is sent when the report is created.	High	Sprint-2
		US-9	As a patient, I can view and download my diagnostic reports from the portal.	Only the patient's available reports are displayed and can be downloaded.	High	Sprint-2
Lab Technician	Test Processing	US-10	As a lab technician, I can update the appointment status from Sample Collected to Processing and Completed.	Status changes are recorded against the appointment.	High	Sprint-2
		US-11	As a lab technician, I can create or attach the diagnostic report when testing is completed.	A report record is created and linked to the correct appointment/patient.	High	Sprint-2
Administrator	Test Management	US-12	As an administrator, I can manage diagnostic test records and their availability.	Test records can be maintained for portal booking.	High	Sprint-1
	Administration & Monitoring	US-13	As an administrator, I can review appointments, approvals, payments and reports from the application backend.	Authorized staff can review required records and operational status.	High	Sprint-2
		US-14	As an administrator, I can view dashboard information for monitoring diagnostic center operations.	Dashboard information reflects the available application data.	Medium	Sprint-2
