

# Project Design Phase-II

## Solution Requirements (Functional & Non-functional)

|               |                                         |
|---------------|-----------------------------------------|
| Date          | 05 September 2026                       |
| Team ID       | ServiceNow                              |
| Project Name  | Medical Diagnosis Center Service Portal |
| Maximum Marks | 4 Marks                                 |

### Functional Requirements:

Following are the functional requirements of the proposed solution.

| FR No. | Functional Requirement (Epic) | Sub Requirement (Story / Sub-Task)                                                                                                                 |
|--------|-------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------|
| FR-1   | Patient Registration          | Registration through Service Portal Capture patient details and create patient record                                                              |
| FR-2   | Diagnostic Test Booking       | View available diagnostic tests Select test date and time slot Submit booking request                                                              |
| FR-3   | Appointment Management        | Track appointment status Appointment confirmation Cancellation / refund handling where applicable                                                  |
| FR-4   | Report & Payment Management   | Payment status tracking Automatic report creation when appointment is completed View / download diagnostic report Report availability notification |

### Non-functional Requirements:

Following are the non-functional requirements of the proposed solution.

| NFR No. | Non-Functional Requirement | Description                                                                                                                                             |
|---------|----------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------|
| NFR-1   | Usability                  | The Service Portal should provide a simple, clear and user-friendly interface for patient registration, test booking, appointments and report access.   |
| NFR-2   | Security                   | Patient and diagnostic information should be protected through authenticated access, role-based permissions and appropriate ACLs.                       |
| NFR-3   | Reliability                | The system should consistently create and update appointment, patient, payment and report records correctly during the diagnostic workflow.             |
| NFR-4   | Performance                | Portal pages and booking operations should respond efficiently so patients can view tests, slots and appointment information without unnecessary delay. |

|       |              |                                                                                                                                       |
|-------|--------------|---------------------------------------------------------------------------------------------------------------------------------------|
| NFR-5 | Availability | The Service Portal should be available to patients and authorized staff when diagnostic booking and status services are required.     |
| NFR-6 | Scalability  | The application should support growth in patients, diagnostic tests, appointments and reports without major redesign of the solution. |
