

Project Design Phase-II

Technology Stack (Architecture & Stack)

Date	05 September 2026
Team ID	ServiceNow
Project Name	Medical Diagnosis Center Service Portal
Maximum Marks	4 Marks

Technical Architecture:

The architecture below represents the implemented Medical Diagnosis Center Service Portal using ServiceNow components, custom application tables, automation, notifications and role-based administration.

Medical Diagnosis Center - ServiceNow Architecture

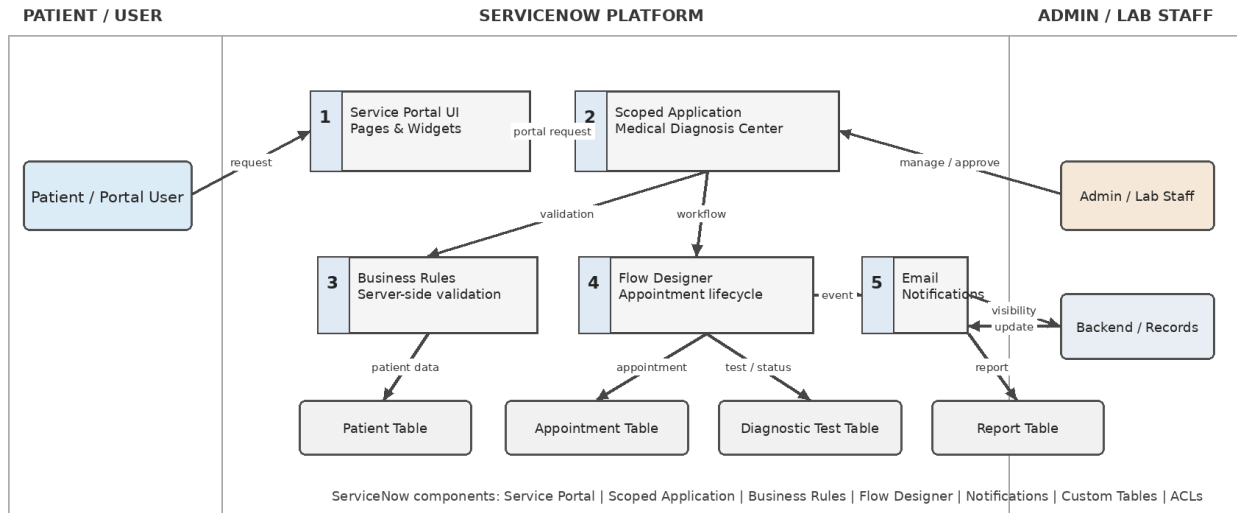

Table-1: Components & Technologies

S.No	Component	Description	Technology
1	User Interface	Patient-facing interface for diagnostic test browsing, booking, appointment tracking and report access.	ServiceNow Service Portal, Pages & Widgets, HTML/CSS/JavaScript
2	Application Logic-1	Server-side validation, automatic field/status updates, cancellation/refund calculation and report creation.	ServiceNow Business Rules, Server-side JavaScript
3	Application Logic-2	Appointment approval and status lifecycle automation.	ServiceNow Flow Designer
4	Application Logic-3	Client-side interaction and validation on forms and portal inputs.	ServiceNow Client Scripts / UI Policies
5	Database	Stores patient, appointment, diagnostic test and report records.	ServiceNow Platform Database / Custom Tables
6	Cloud Database	No separate external cloud database is configured; the application uses the ServiceNow platform data layer.	ServiceNow Platform
7	File Storage	Handles report file attachments associated with application records when applicable.	ServiceNow Attachments / Platform Storage
8	External API-1	No external API is required for the implemented core solution.	Not implemented
9	External API-2	No second external API is required for the implemented core solution.	Not implemented
10	Machine Learning Model	No machine-learning model is used in the implemented application.	Not applicable
11	Infrastructure (Server / Cloud)	Developed and demonstrated on a ServiceNow Personal Developer Instance / ServiceNow cloud platform.	ServiceNow Cloud Platform / PDI

Project Design Phase-II

Technology Stack (Architecture & Stack)

Table-1: Components & Technologies - Continued

S.No	Component	Description	Technology
11	Infrastructure (Server / Cloud)	Developed and demonstrated on a ServiceNow Personal Developer Instance / ServiceNow cloud platform.	ServiceNow Cloud Platform / PDI

Table-2: Application Characteristics

S.No	Characteristics	Description	Technology
1	Open-Source Frameworks	No separate open-source application framework is used; the project is built with native ServiceNow capabilities.	ServiceNow platform APIs / native capabilities
2	Security Implementations	Authenticated access, application scope, roles and ACLs are used to restrict access to application data and backend records.	ServiceNow ACLs, Roles, Application Scope, Authentication
3	Scalable Architecture	Portal UI, application logic/workflow and data are separated into platform components, allowing additional users, tables, pages and workflows to be added.	Service Portal, Business Rules, Flow Designer, Platform Database
4	Availability	The application is hosted on the ServiceNow cloud platform / PDI and is available according to the configured instance.	ServiceNow Cloud Platform
5	Performance	Server-side validation and automated workflows reduce manual processing; portal operations use ServiceNow records and server-side logic.	Business Rules, GlideRecord, Service Portal, Flow Designer

Implementation Note:

External APIs and machine-learning components are marked as not implemented because they are not part of the implemented core solution.
